R2009Q400 HETS User Interface (UI) Release

Summary of Impact on Trading Partners

</div>

The purpose of this summary document is to prepare users for the upcoming
changes to the HIPAA Eligibility Transaction System (HETS) User Interface (UI).
The R2009Q400 HETS UI release will address modifying data elements and
display screens. Please refer to the following details for additional information.

1. Update the Medicare rate table to display 2010 Deductible and Co-payment rates

The HETS UI application will display the approved Medicare 2010 Deductible
and Co-payment rates.

This information will appear on the Deductibles/Cap tab and the Inpatient tab,
covered in sections 5.4.4 and 5.4.9, respectively, in the User Guide. To access
the HETS UI User Guide, click on this URL:
http://www.cms.hhs.gov/HETSHelp/downloads/HETSUIUserGuide.pdf

NOTE: The 2010 rates have not been published as of the date of this document.
Notification of the new rates will be made via Medicare's regular provider
communication process. Users can also contact their MAC for information on the
new rates.

2. Implementation of the new Medicare Secondary Payer (MSP) Type Code

Beginning with this release, the HETS UI application will return "WC", for
Workers' Compensation Medicare Set-aside Arrangement (WCMSA). This new
MSP Type Code is different from the Insurance Type Code "15" that will continue
to be returned for traditional Workers' Compensation.

This information will appear on the Medicare Secondary Payer (MSP) tab,
covered in section 5.4.7 in the User Guide.

For more information on the "WC" MSP Type Code, click on the Medicare
Learning Network URL:
